Explanatory note

Figures in the tables presented below have been reported by participating States on the basis of the standard instrument for international reporting of military expenditures. For analytical purposes, the information on military expenditures received has been computerized, with minor adjustments, to conform to standard statistical practices.

The replies from States are available at the Centre for Disarmament Affairs, United Nations Headquarters.

I. Introduction

1. On 10 December 1996, the General Assembly adopted resolution 51/38, in which, *inter alia*, it reiterated its recommendation that all Member States should report annually, by 30 April, to the Secretary-General their military expenditures for the latest fiscal year for which data were available, using, for the time being, the reporting instrument as recommended in its resolution 35/142 B of 12 December 1980. In paragraph 1 of the resolution, the Assembly recommended the guidelines and recommendations for objective information on military matters to all Member States for implementation, fully taking into account specific political, military and other conditions prevailing in a region, on the basis of initiatives and with agreement of the States of the region concerned.

2. Pursuant to the request of the General Assembly, the Secretary-General requested all Member States to submit their reports no later than 30 April 1997.

3. The Secretary-General has, to date, received reports from 27 countries, all of which had used the reporting instrument. These reports are reproduced in section II of the present report. Further replies will be issued as addenda to the report.
